

VERIZON

-Power Your Device on.

-It may take up to several hours for your device to program over-the-air. After successful activation, your device will pull down the default SSID/Password from Verizon MDM portal. The default security policy is enforced from Asavie Moda at time of activation.

- **Default SSID: SCDistanceLearning**
- **Default Pasword: SCStudent1**

AT&T

Please follow the steps listed below:

1. Press and hold the Power Button for 3 seconds until the welcome logo appears on the display.

2. After a few seconds, the Wi-Fi signal icon will appear on the display.
3. Press the Menu Button until you see either 2.4G WIFI Info or 5G WIFI Info on the display.

4. Then, press the Power Button to see the network SSID and password information.
5. On your chromebook, look for the network (SSID) "Moxee HotspotXX_2.4G" or "Moxee HotspotXX_5G", where XX are the last two digits of the device IMEI.
6. Click "Connect" and enter the default password found on your device in step #4. Your Wi-Fi SSID and password information can be found on your device's "Wi-Fi Info" screen or on the SSID label located underneath the battery cover.
